# ZoneTouch

*Air Conditioning  
Comfort with Ease*

# ZoneTouch

by 

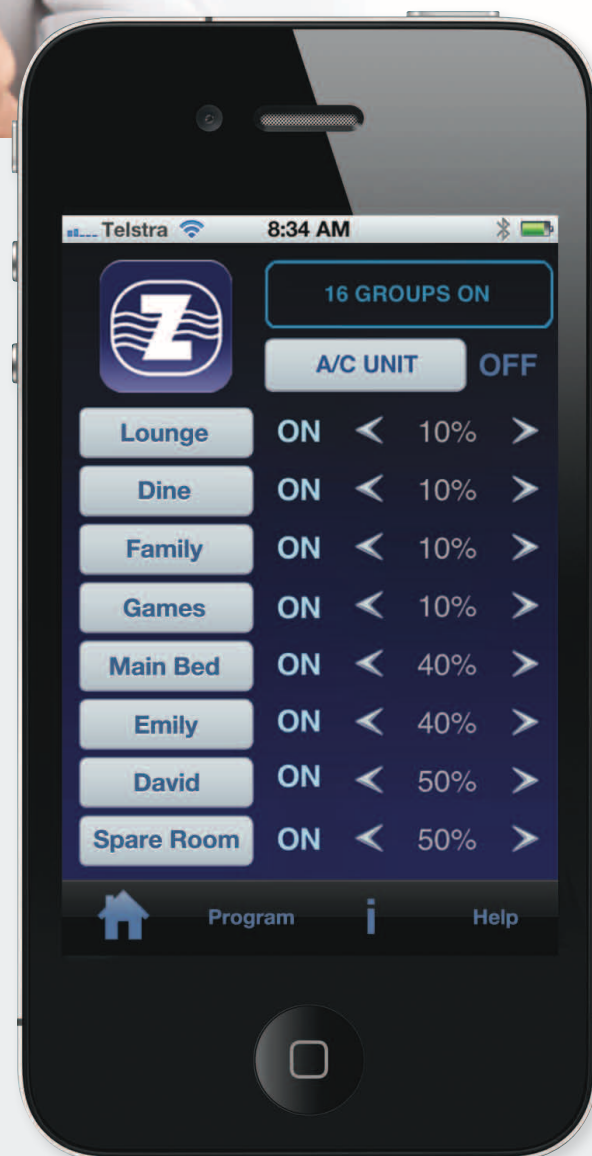

**ZoneTouch is a zone control system which is designed to work in conjunction with your air conditioning installation to provide optimum control over the amount of heating and cooling delivered to each area of your home.**

ZoneTouch interfaces with the zone dampers in the air conditioning system by both modulating them and turning them on and off to control where and when the heating and cooling is needed.

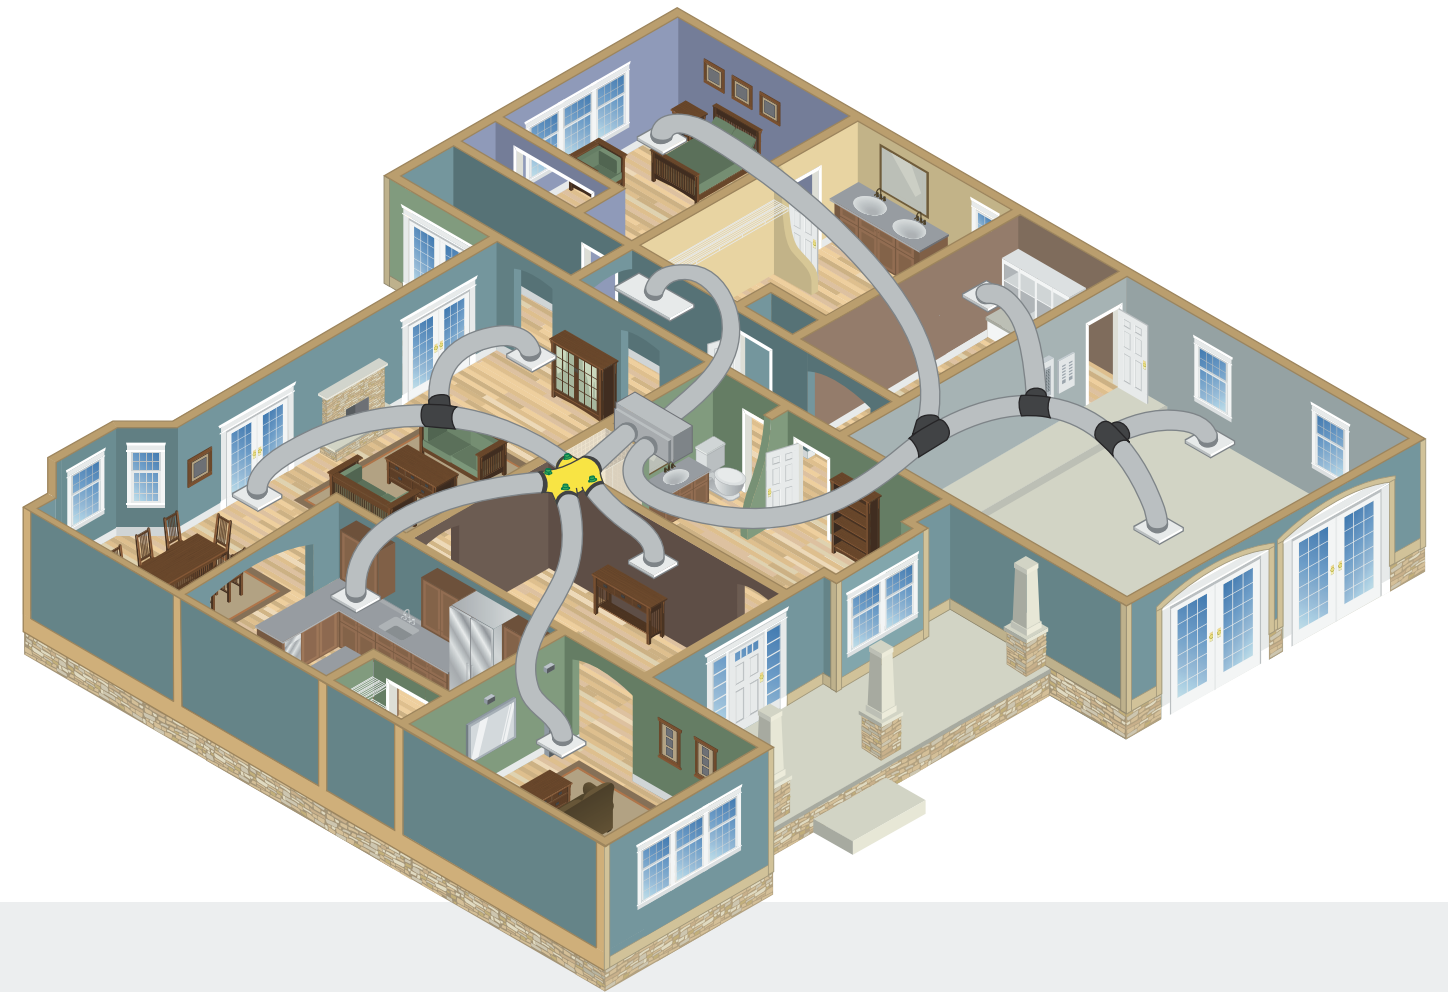

It can give you this complete control simply and easily through your smart phone.

The new ZoneTouch comes complete with its own smart phone App which you simply download, connect to your Wi-Fi and configure to your air conditioning system.

The App interphases with the zoning system of your air conditioner allowing you to operate and adjust the system from anywhere in your home.

## *Air Conditioning Comfort with Ease*

### Features

- **Unequalled control of your air conditioning system.**  
With ZoneTouch you can direct where the heating and cooling of your home to where it is needed and just as easily modify it to suit a change in circumstances.
- **Remotely turn unit on or off**  
By using the ZoneTouch system you can turn your air conditioning system on and off without accessing the units standard controller.
- **Easy and simple to use**  
Whether by using your Smart Phone or a Touch Pad, ZoneTouch can easily access the functions of your air conditioning system and make any changes simply
- **Programming**  
Programming your system to deliver heating and cooling to different areas of your home and different times of the day is just one of the many functions.
- **Zone modulation**  
ZoneTouch allows you control the amount of heating and cooling delivered to each zone in your home through modulating the zone dampers. The modulation of the dampers is in ten percent increments making the adjustment of air flow to each zone very precise.
- **Four touchpad capability**  
For larger homes the ZoneTouch can accommodate up to four individual touchpads
- **Contributes to reductions in energy consumption**  
By installing zones in an air conditioning installation along with an effective zone management system like ZoneTouch, you can reduce the load on your air conditioner which in turn reduces the power consumption.
- **No warranty conflict with original equipment supplied**  
As the ZoneTouch is a 24 volt system, it will not negatively affect any of the systems operating the air conditioning unit.
- **Full operation from your Smart Phone**  
Works equally as well with both the iPhone and Android platforms.
